NORDIC VENT

Filters and maintenance

Swedish-made filters.
Tailored service for every installation.

Swedish design, Swiss made

THE FILTER RANGE

Every filter, for every installation

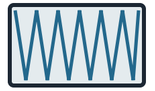

Bag filters

Synthetic or glass fibre, ISO Coarse to ePM1

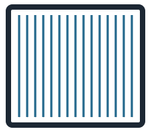

Compact filters

V-bank design, large media area, low pressure drop

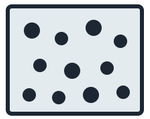

Pre-filters and panel filters

Pleated, cardboard or metal frames, roll media

Absolute filters

EPA, HEPA and ULPA, E10 to U15 to EN 1822

Molecular filters

Activated carbon against odours and gases

Custom-made

Special sizes, high temperature, grease

FILTER MEDIA

Synthetic or glass fibre: the right choice

Synthetic

Resistant to moisture and handling

Lightweight, no loose fibres, incinerable

Excellent price / performance ratio

Ideal for: offices, shops, pre-filtration, humid outdoor air

Glass fibre

Stable mechanical efficiency over the whole service life

Fine fibres: high efficiency on fine particles

Low pressure drop, less fan energy

Ideal for: healthcare, food, industry, fine ePM1 filtration

FILTER CLASSES

From pre-filter to cleanroom

ISO Coarse	ePM10	ePM2.5	ePM1	EPA / HEPA
Pre-filtration, coarse dust (formerly G3, G4)	Pollen, dust (formerly M5, M6)	Fine particles, supply air	Very fine particles (formerly F7 to F9)	E10 to H14, U15: hospitals, cleanrooms

ISO 16890 — EN 1822

We choose the class for the building’s use and the outdoor air: the right air quality without wasting energy.

SECTORS

Wherever air matters

Offices and retail

Comfort and productivity

Healthcare and care homes

Hygiene, absolute filters

Food industry

Clean air in production

Pharma and cleanrooms

HEPA, certified classes

Industry

Halls, workshops, process

Data centres

Equipment protection

Schools

Healthy air in classrooms

Housing

Apartment blocks and houses

MAINTENANCE

We take care of the whole installation

Filter replacement

Planned, at the right time, without needless downtime.

Filter monitoring

Tracking of filter loading, with a reminder before pressure drop costs you.

System cleaning

Ducts, casings, heat exchangers, diffusers and grilles.

Full maintenance

Fans, belts, controls, dampers, inspections.

Optimisation

Less energy, better air quality, correct air flows.

Tailored contract

Fitted to every installation and every budget.

INTRODUCTORY OFFER

Free on-site diagnosis

We come and check your whole installation.
Free of charge and with no obligation.

What we check

Filter condition and class

Air flows and pressure drops

Cleanliness of ducts and casings

Fans, controls, energy use

You receive a clear report and costed recommendations.

HOW IT WORKS

Personal and tailored, for every system

01

Appointment

One call or e-mail is all it takes.

02

Free diagnosis

On-site visit of the whole installation.

03

Proposal

Tailored filters and maintenance, clear price.

04

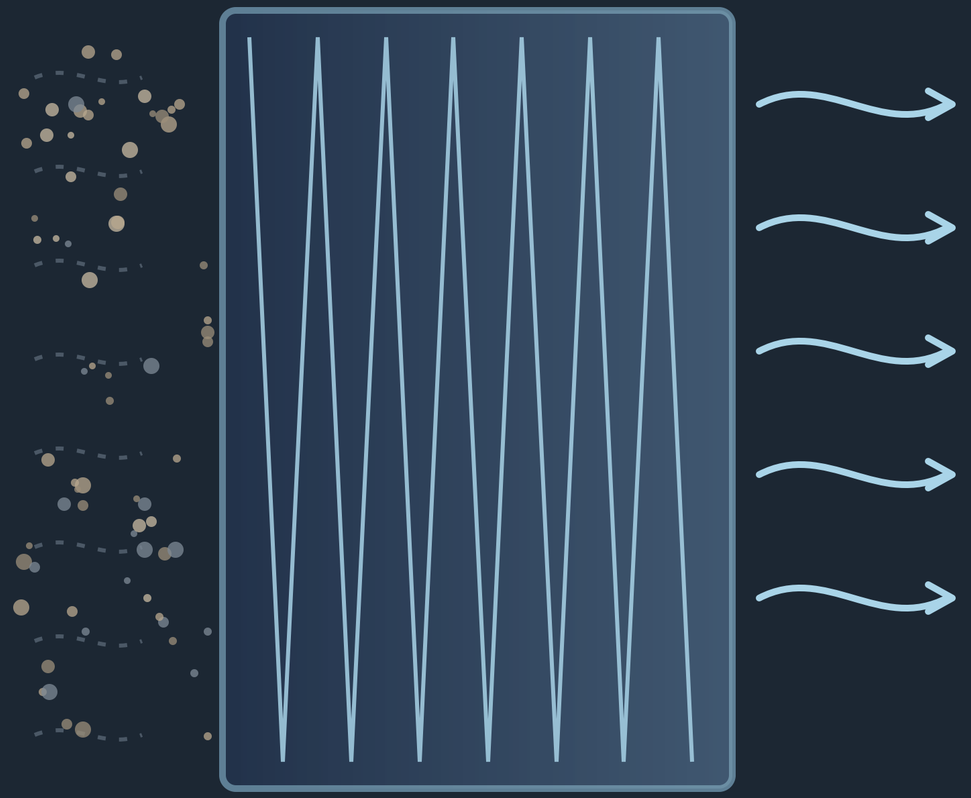

Follow-up

Regular replacements, checks and reports.
